2242 E Main St
Bexley, OH 43209

Dear All,

Please be advised, that my wife, Marlee Snowdon, and I are the owners of the property located at 2711 Brentwood, and we authorize Andrew Rosenthal / GRA+D Architects to act as our representatives throughout the design approval and building permitting process.

Best,

Rick Snowdon

Bexley, Ohio 43209
(614) 559-4200

The structure located at 2711 Brentwood Avenue cannot be determined to be historically nor architecturally significant. The design is typical for the era in which it was built - however it is not architecturally remarkable. Aspects of the design suggest it may have been an adaptation of a floor plan not originally designed for this site. The architect and builder are not known. Based on records solicited from the Bexley Historical Society - it is not known to have been built for nor occupied by individuals of historical significance.

In studying the possibilities for a renovation vs. a new-build we found multiple factors supporting new construction:

- The linear nature of the floorplan and compartmentalization of spaces do not support more contemporary living patterns.
- The Roosevelt façade of the house is particularly ungracious in its relationship to the neighborhood. A combination of factors (the presence of the garage on the lower level here paired with fact that the house is already beyond the allowable setback at this location) make a remedy exceedingly challenging.
- Architecturally the language of the house features low and sloping rooflines – expanding the floorplan would require significant reconstruction of the existing roofs to arrive at a satisfactory solution.
- The split-level floor plan makes the house incompatible with contemporary aspirations to age-in-place. The garage's location on a lower level makes this condition particularly problematic.
- The existing garage does not offer clearance for the parking of contemporary vehicles. The garage being located under living spaces make this challenge significantly more complex to resolve.
- The existing construction is from an era where energy conservation was not a priority – reworking the house to meet contemporary standards, while possible, would be an onerous undertaking yielding less than ideal results.

Our in-house assessment is supported by the attached evaluation provided by Acock Associates Architects. Acock Associates has significant experience doing high-end custom residential design (new-builds and renovations) as well as historic preservation / adaptive reuse projects (including the award-winning renovations to the main library at The Ohio State University).

RE: 2711 Brentwood Avenue, Bexley, Ohio 43209

Dear Andrew,

It was a pleasure walking through and around the 2711 Brentwood Residence. I understand the purpose of this letter is to provide my assessment of whether this residence is a contributing structure to the city of Bexley and deserving of a degree of conservancy.

The structure is a two-story split level that fronts Brentwood Road on the north and Roosevelt Avenue on the west. While the Bexley Historical Society has records of the home's original owner, they have no information on the Architect, Designer, or Constructor, or any information of significance on the home itself. Stylistically, I would classify it as derivative of mid-century modernism. From a formalistic perspective, I do not believe it stands out as particularly innovative for either its time or today. There are some nice elements, the north facing clerestory servicing the south facing living room, but the overall composition, the massing of the one- and two-story elements, and the roof lines are unremarkable. The elevations fronting the public streets seem particularly closed down, containing a random composition of the horizontal ribbon and punched windows with high sills. In my opinion, it does nothing to engage the neighborhood, and its disengagement has little aesthetic payoff.

The construction of the home appears to have been well done, and despite its lack of maintenance in several areas, the home is in relatively good shape. However, like its design, I did not encounter any construction that was particularly innovative for its time or today. The cost of preserving the existing exterior finishes, while bringing the home up to today's energy efficiency standards, will far exceed their value.

In summary, it is my opinion that the home is not a contributing structure to the neighborhood or the city and does not warrant any degree of conservancy.

Please feel free to call with any questions.

Best Regards,

Mitchell D. Acock, AIA

VOYAGE SELECT

Contemporary Pivot Doors

Elegance, Re-Imagined.

Winner of Window+Door Magazine's 2022 Award for **Most Innovative Entry Door**

FOR THOSE LOOKING TO MAKE A GOOD IMPRESSION, START WITH AN AWE-INSPIRING ENTRYWAY.

Traditional hinged doors are hung on a frame which limits their size and weight, but pivot doors operate by turning around a spindle (acting as the "pivot" point). This gives the door a sleek, contemporary look while taking the weight off of the door frame. The spindle also allows for larger, heavier panels measuring up to 9' wide and 18' tall! Pivots can be a truly breath-taking addition to any project.

Our pivot doors are not only beautiful, but easy to use as well. Thanks to our state-of-the-art engineering, each door can be operated almost effortlessly, even when panels exceed 300lbs. Each unit is fabricated with a concealed self-closing mechanism for ease of use, and a multi-point locking system to secure your door against forced entry.

Each system is handcrafted at our warehouse in Las Vegas, NV with quality hardware, steel pin spindles, and our unique 6063-T6 aluminum extrusions. Our 10 year warranty and dedicated customer service means you can put your mind at ease knowing that Panda will be there for you even after your door has been installed.

HARDWARE OPTIONS

LOCKING MECHANISMS

- ROLLER LATCH LOCK
- MULTI-POINT LOCK
- Most robust lock available.
- Elegant brushed chrome finish.
- Added protection against forced entry.
- Typically a 3-point lock, but up to 2 extra points can be added for extra-large doors.
- Can be motorized with automated "unlock" and "lock" features.

HANDLE OPTIONS

ONE (MINIMAL)

Available in Black, Chrome, Brass, and White

SEATTLE (MINIMAL)

Available in Black and Chrome

WONDER (MINIMAL)

Available in Black, Chrome, and Champagne

PHOENIX (SLIM)

Available in Black and Chrome

SEATTLE (SLIM)

Available in Black and Chrome

SEOUL (SLIM)

Available in Black and Chrome

LADDER PULLS

Ladder pulls are standard on door exteriors but can also be added to the interior upon request. Ladder pulls are available as round or square profiles with chrome or black finishes.

- Ladder Pull - Begins from 4ft up to 7ft.

PIVOT SIZING

Panda Windows and Doors is known for creating the largest doors in the industry. Our Voyage Select Contemporary Pivot Doors are no exception. Thanks to our innovative frames and hardware, we can create pivots up to 9ft wide and 18 ft tall with a maximum weight of 750lbs!

When deciding on the size of your new pivot door, it is critical to work with an engineer that specializes in pivot doors like those on our team at Panda. Remember, the larger the door, the closer the pivot point must be to its center to maintain a balanced and smooth operation. When building pivot doors, engineering experience is key to making your new system operate with ease.

LED/RECESSED HANDLE (up-charge)

LED lights can be combined with recessed door handles to provide a smooth, seamless design with an extra "wow" factor. This feature can be placed either horizontally or vertically.

DOORS (TO YARD)

AVANTE®

Avante® garage doors are designed with architects, contractors and homeowners in mind. With a sleek aesthetic and section seal, these doors are the perfect choice to modernize any home. Not only can they transform garages, they can also be used as an indoor loft partition or as versatile solarium doors. Many glass options are available to control the degree of light transmission and privacy.

Model AX, Bronze (Anodized) Frame with Frosted Tempered Glass

STYLE AND CONSTRUCTION

- Aluminum frame provides a virtually maintenance-free, long-lasting door.
- Intellicore® polyurethane insulated rails and stiles. (Model AXU)
- R-value 3.8/U-factor 0.86. (Model AXU when glazed with clear insulated glass)
- Many glass and panel options available.
- Section joint seal helps keep out air and water.
- Integral reinforcing fin provides increased strength and longevity. (Available on double car models)
- Heavy-duty steel ball bearing rollers with nylon tires provide quiet operation.

*Doors wider than 14' include built-in reinforcing fin. Standard doors 12' and under do not use built-in reinforcing fin. Usage on widths 12'2" to 14' depend upon glass weight. WINDCODE® doors may vary. Contact your Clopay Dealer for details. Calculated door section R-value is in accordance with DASMA TDS-163.

FRAME/SOLID PANEL COLOR OPTIONS

CUSTOM PAINT OPTIONS

Custom colors make Avante® garage doors personal. Choose a Color Blast® finish or RAL Powder Coating to create the perfect door. The only limit is your imagination! See your Clopay Dealer for details.

Model AXU not available with RAL Powder Coat finish.

DOOR DESIGNS

HARDWARE

Attractive color-matched aluminum grip handles. Available in all standard color options.

WARRANTIES

FINISH LIMITED 5YR WARRANTY
HARDWARE LIMITED 3YR WARRANTY

GLASS/PANEL OPTIONS

*Glass is tempered.
†5/16" clear laminate impact rated glass is available only on AXWB/AXUWB.
Acrylic windows require special cleaning. Never use products that contain ammonia or petroleum products to clean acrylic. Please visit www.clopaydoor.com/acrylic for complete details.

- Glass available in single pane or insulated (laminated and mirrored glass not available insulated).
- Panels can be aluminum to match the aluminum frame. Glass/acrylic panels may be combined with aluminum panels. Custom glass and colors available.

Doors available to meet many regional wind load requirements. WINDCODE® doors over 16' wide may have reinforcement hardware that shows through the glass panels of the door.

See your Clopay Dealer for details. Or for more information scan this code.

Top 10 Reasons to Choose Sure-White® EPDM

Carlisle SynTec Systems' Sure-White EPDM membranes offer an optimal solution for nearly any low-slope roofing situation. Sure-White EPDM is a durable material that has more than 34 years of proven, in-field performance. With significant physical property advantages, cooling benefits in southern climates, and innovations in product technologies, EPDM is still defining the standard in the commercial roofing market. Below are the top 10 reasons to consider Sure-White EPDM on your next roofing project.

1 TIME TESTED

EPDM is time-tested in real-world conditions. White EPDM roofing systems have been used for more than 34 years.

2 SUPERIOR WEATHERING RESISTANCE

EPDM has advanced resistance to UV exposure, heat, and mold:

- » ASTM G155 for Xenon Arc = 25,200 kJ/m² for white EPDM
- » ASTM D573 for heat aging = 68 weeks at 240°F
- » ASTM G21 for fungi = zero (no growth)

3 THICKNESS

EPDM's nominal 60 or 90 mils of weathering protection is significantly greater than the 20–25 mils over scrim of most plastic-based sheets. Sure-White is also available in 115- or 145-mil FleeceBACK® for added toughness.

4 SUPERIOR HAIL RESISTANCE

Numerous studies and real-world experience confirm that EPDM's 465% elongation (ASTM D412) and weathering resistance result in superior hail damage resistance and UL2218 Class 4 rating. White EPDM remains flexible throughout its life cycle.

5 ENERGY EFFICIENT

In southern climates, the solar reflective benefits of white EPDM helps to reduce cooling costs. The cross-linked molecular nature of EPDM can handle the heat of southern climates.

6 ROOFTOP SAFETY

EPDM's rubber surface provides more grip than white plastic-based membrane, which is important to maintenance personnel.

7 STABLE

EPDM is the most dimensionally stable membrane, remaining flexible even in extremely cold conditions. Per ASTM D5279-08, EPDM is more flexible at 0°F than TPO at 100°F.

8 REPAIRABILITY

EPDM rubber doesn't need internal scrim like plastic backed sheets and remains repairable with peel & stick flashings even at the end of its service life.

9 QUALITY SEAMS

Carlisle's labor-saving Factory-Applied Tape and pressure-sensitive flashings improve the quality and consistency of seams. Electrical seaming equipment consumes natural resources and is dependent on the applicator using correct speed, temperature, and pressure to avoid false or cold welds.

10 FEWER SEAMS

White EPDM is available in large 16'-wide to 20'-wide sheets for adhered applications, resulting in up to 50% fewer seams compared to 10' wide plastic based membranes.

ARCHITECTURAL PANEL INTER-LOCK IL20

INTER-LOCK IL20

Project Name: _____
 Architect: _____
 Installing Contractor: _____
 General Contractor: _____
 Specification Section: _____

Stiffener Profile _____ _____
 _____ _____

INTER-LOCK IL20 is an architectural panel which is snapped together during installation. The panel is an integral interlocking system by design which installs in one direction from a given starting point. A double male starter panel is available (for a minimal setup fee) and may be installed in the middle of a roof area to achieve a symmetrical layout. Inter-Lock is a very flexible panel which works well with a wide range of building designs.

Uses & Applications

Product uses include roofs with slopes as low as 3:12, vertical fascia, equipment screens, mansards, and wall panels. This system may also be installed on tapered roof areas.

Advantages

- Factory Applied Non-Curing Sealant - for superior watertightness
- Engineered Snap-Together design - for easy installation
- Symmetrical Visual Aesthetics - providing non-directional appearance
- Expansion Clips - allows for thermal expansion and contraction
- Continuous Interlocking Seam - no seam disengagement
- Anti-Siphoning Seam Design - prevents water infiltration
- Continuous Roll Formed Lengths - eliminates need for panel lap joints (4' min. panel length)
- Total System Warranties available - for total confidence

Expansion Clip

Performance Tested

- UL-580 Wind Uplift
- ASTM E1592 Uniform Static Air Pressure
- ASTM E331 Water Penetration
- ASTM E283 Air Leakage

Please consult DMI for applicability of test reports for your project.

5/8 x 12	0.625"	10.25"	9.91"	0.34"

1. Certificates and Listings

- a. Cal Fire (WUI): CA SFM 12-7A-1 Listing No. 8140-2134:0101
- b. Pre-consumer Recycled Content: SCS Global Certification—Minimum 70%

2. Properties

- a. Density: ASTM C 1185, 40-50 lb/ft³
- b. Flexural Strength: ASTM C 1185, > 1800 psi
- c. Coefficient of Linear Expansion: ASTM D 6341, < 0.000014 in / (in*oF)
- d. Impact Resistance: ASTM D 6110, > 50 in.

3. Performance

- a. Fungi Rot: AWWA E10, Brown Rot-Negligible Loss, White Rot-Negligible Loss
- b. Termite Resistance: AWWA E1, > 9.0
- c. Water Absorption: ASTM D 570, < 1.5%
- d. Flame Spread: ASTM E 84, < 200

4. Manufacturing Tolerances

- a. Width: ± 1/16 in.
- b. Thickness: ± 1/16 in.
- c. Length: +2.0 / -0.0 in.

Example: **WS-W36614-BZ**

For custom requests please contact customs@wacighting.com

DESCRIPTION

Light projection tuned with precision.

FEATURES

- Discrete cylinder with minimal mounting hardware
- Weather-resistant powder coated finish
- WS-W36614 is Up & down light, WS-W36610 is one direction
- Light engine is factory sealed for maximum protection from the elements
- Driver concealed within the fixture
- 5 year warranty

SPECIFICATIONS

Color Temp:	3000K
Input:	120-277V,50/60Hz
CRI:	90
Dimming:	ELV: 100-10%
Rated Life:	72000 Hours
Mounting:	Can be mounted on wall in all orientations
Standards:	ETL, cETL,IP65 Wet Location Listed
Construction:	Aluminum hardware with lens diffuser
