

Aggregation Programs with Clean Energy

Trebel is a leading energy consultant in the state of Ohio that serves many communities of size and demographics. We listen to our customers, educate them on the available program options, and finally provide information that helps community leaders make good decisions. For years we have made clean energy available to our customers and yet nearly all have made the decision to pursue the lowest price for their constituents. Despite this we continue to ask for clean energy options in all our Request for Proposals so community leaders can see the difference in price between conventional and clean energy. We explain the differences in how energy can be made clean (REC's vs Carbon Neutral Products) and lastly how to structure programs that can offer both types of energy by offering a low cost option (conventional/fossil energy) with an Opt-up option to clean energy.

Through our industry contacts and our legal Counsel we have access to the REC markets. By having access to these markets, we can more timely provide options for REC purchases to our Customers when designing an aggregation program. We can help with decisions based on REC type, location, cost and overall compositions of the portfolio to deliver on community preferences. We feel this is very unique to Trebel and we are NOT tied to one Supplier to deliver the whole package. This directly translates to better overall pricing and package verses a monopolistic approach. You still get a fully custom product that still delivers maximum value to the residents.

Further, Trebel's owner, Scott Belcastro is a direct owner/user of clean energy on his own home. We don't push or sell products. We live and believe in the clean energy way of life. It makes difference and we can talk about these products with direct experience.

Please see the following page for a sample clean energy list of programs established by Trebel.

COMMUNITY	UTILITY	FOSSIL RATE	CLEAN RATE OPTION
Madison Township- Franklin County	AEP	\$ 0.0459	\$ 0.0499
City of Columbus- Franklin County	AEP	N/A	\$ 0.0788
Genoa Township- Delaware County	AEP	\$ 0.0474	Carbon Free
Miami Township- Montgomery County	AES	\$ 0.0699	\$ 0.0729
Clay Township- Montgomery County	AES	\$ 0.0695	\$ 0.0735
Cross Creak Township- Jefferson County	AEP	\$ 0.0664	\$ 0.0708
Jefferson Township- Clark County	AES	\$ 0.0711	\$ 0.0751
Polk Village- Ashland County	Ohio Edison	\$ 0.0687	\$ 0.0728
Bethel Township- Clark County	AES	\$ 0.0685	\$ 0.0727
Green Camp Township- Marion County	Ohio Edison	\$ 0.0665	\$ 0.0705
Green Camp Village- Marion County	Ohio Edison	\$ 0.0665	\$ 0.0705

* Carbon Free product matches Community's electricity with emission free energy certificates sourced from a generating unit that does not directly produce any emissions of carbon dioxide. Supplier's Carbon Free product is generated 100% by nuclear, wind, solar or hydroelectric generating facilities that serve Community's area.
