Vector Control –

Over 150 traps are set throughout Franklin County each week. Bexley is divided into two zones which are listed in the table below with total mosquitos collected for West Nile Virus (WNV) testing. The numbers in the table reflect only female mosquitos. This is because only female mosquitos bite and are capable of transmitting WNV. As mosquitos test positive for WNV, the area is treated to reduce the number of adult mosquitos. Bexley is divided into two zones, Bexley North and Bexley South, as listed in the table below.

Zone	Total Mosquitos Collected and Tested	WNV+ Pools	ULV truck sprays
Bexley North	928	4	2
Bexley South	903	9	3
