Natalie,

Is there any way to have this email uploaded to the tree commission agenda under 202 S Columbia?

Thanks!

Best regards,

Elena

**Subject: FW: 202 Columbia**

Elena,

Please see email below from Allan Gribler, at Ahlum and Arbor, regarding the health of the two trees in question, the red maple in the right of way, and the linden just inside the property line.

Call me with any questions.

Thanks,

Nathan Sampson

**Subject:** Re: 202 Columbia

Regarding two trees in question near at the front left corner of 202 S Columbia Ave:

The 19 inch diameter linden has internal decay obvious at the base of the trees, girdling roots, and a declining canopy. This tree has poor form and structure from previous injuries including a lightening strike. I would recommend this tree's removal.

The 9 inch diameter red maple nearby also has a large number of girdling roots above and below ground line. I would recommend removing this tree also.

After all construction is completed new trees could be planted nearby as replacements.

Please contact me with any questions.
