Greetings!

I wanted to follow-up to the request my wife submitted earlier this year to the Tree Commission. We are eager to see what options there are. Is there a way to discuss this during the next Tree Commission meeting? Thank you!

Hello,

I am inquiring about our curb lawn/tree issues at our house. Our address is 222 N. Remington. We have two large trees that completely block all light from getting to our curb lawn, this we have no grass (EVER) and it is a complete mud pit.

One of the trees has a root system that has also torn up our driveway and approach, to the point that the city has replaced our sidewalk and driveway approach. Grant Archer came out to assess the situation about a week ago, so please inquire with him, too.

We are interested in getting a new driveway and potentially selling our home. However, the lack of grass/mud pit situation/tree roots would not bode well for pictures or interested buyers.

I grew up in Bexley and came back here to raise my young family. We LOVE the trees, but this particular one is causing us some issues and we are requesting it be taken down. We would welcome a new, smaller tree be planted in its place.

Thank you for your consideration.

Best,

Rafie Pariser Hurley
