Comments	
4g	<ul style="list-style-type: none"> - City in-house Landscape Plan - Existing plant material consists of numerous overgrown and declining woody plants. Much the current landscape can be considered in fair to poor condition. - Per Landscape Plan, proposed plantings for this project consist of site and space appropriate plant material. New plantings in maturity will provide a net increase to the site's canopy cover. Plant selections are hardy and should provide a clean, attractive, and utilitarian landscape for the property. - Evergreen garden is a great addition and provides a fun way to introduce numerous species into a relatively small space. This garden, situated at the west end of the property, will also provide both a visual buffer as well as a nice aesthetic backdrop to the neighboring community garden. - Recommend approval of Landscape Plan as submitted.
