

Mayor's Update to City Council June 13, 2017

Solar Contract Signed

The City has contracted with Telamon to perform solar engineering and project oversight services.

E-SID Update

In doing research on implementation of an E-SID in Bexley, I've learned that existing state statute doesn't adequately provide for a residential E-SID district. We're going to be working with Jean Carter-Ryan at the Columbus-Franklin County Finance Authority, and their legal counsel, to help advocate for some changes to the State statute.

Franklin County Opiate Action Plan

ADAMH has worked through a public process for an opiate action plan, developed in conjunction with the City of Columbus and Franklin County. I've asked them to present the plan to Council and the CHAT group, and they suggested September might be a good time for those presentations.

Food Waste Pickup Pilot Program

For several years we have been brainstorming how to provide food waste pickup/recycling/compost services, but have until now been unable to because of a lack of vendors for proper receipt and processing of food waste. We have been in talks with a new vendor that looks like they would be able to provide food waste pickup services to Bexley, and last week Bill Dorman and I toured their facility. We'll be working on a pilot program concept and will be presenting it to council to discuss and consider as an option for Bexley.

Coming Up
