Hello,

I was recently informed that there will be a City Council meeting to discuss a proposal to add a bike lane to Drexel Ave which will result in one side of the street losing parking availability. It's difficult for me to tell based on the information I have found online but if this extends to the area just north of the Drexel / Main Street intersection I think it is a very bad idea. There is already an issue with a lack of parking there, particularly during the late afternoon hours, and I'm concerned it will have a detrimental impact on my business as well as the other small businesses of that area. I'm hoping that if the bike lane proposal is accepted it will at least keep a few blocks north of the intersection open to parking on both sides of the street.

Thanks for your consideration,
