- GHG Report
- Rapid 5 pick up – Nelson and Jeffrey River Cleanup 8/27/22
- GHG emissions – task force – Lisa, Ashley
 - Create a task force to serve as both an advisory and working group to establish the City’s focus on energy efficiency.
 - Ensure the task force is familiar with energy equity considerations.
 - Identify stakeholders. It will be essential to have open channels of engagement with community groups.
 - Set a target for energy efficiency based on climate and equity goals. Be sure that no resident experiences a home energy burden above 5%.
 - Pass a resolution to ensure action is taken and establish the City’s commitment.
 - Identify priority actions to achieve the energy efficiency target. Be sure to focus on local government operations, private homes, and
 - commercial buildings.
 - Agree to the priority actions. This may include opportunities such as: utility programs and property assessed clean energy (PACE).
 - Identify action partners. Not only will you need people with technical skills to implement projects and programs, you will also need
 - community partners to help with outreach and for evaluation.
 - Identify funding sources.
 - Develop a work plan and begin.
 - * There’s also additional action items re: solar, fleet transition (Clean Fuels Ohio and PCFO), renters, future GHG emissions inventories
- Litter Pick Up Ideas – Saturday, 7-23 – 4 pm
 - JCC bridge in the future
- Other ESAC initiative updates
 - Mosquito pilot is underway June 15- Sept 15

Hi all,

Here is a recap of our meeting last week. Next meeting will be Tuesday, August 16.

Please consider volunteering at a Green Bexley event - you can see what is needed at the Sign Up for community events link.

Also, attached is the city of Bexley's 2019 Greenhouse Gas Inventory.

Thanks, everyone!
