

Resolution # 22.

Resolution Authorizing the issuing of an additional Bonds for the purpose of completing the construction of the Water Supply System, as provided and authorized by Section 3939 of the general code of Ohio.

Whereas it will be necessary for the Council of the Village of Berley, State of Ohio, to issue an additional bond issue, in order to complete the present installation of a water system within the said Village of Berley, and

Whereas the estimate of the Sanitary Engineer will require the full limit of bond issue on the assessed valuation of the property within the said Village of Berley, which is approximately \$2,140,000 in order to acquire sufficient funds for the construction of said water system, and

Whereas a bond issue of \$90,000.00 has already been issued by said Village of Berley leaving an available bond issue of \$17,000.00.

Therefore, be it resolved by the Council of the Village of Berley, State of Ohio.

That an additional issue of an additional \$17,000.00 bond (which aggregate issue is still within the limitation of 5% of the Village duplicate as prescribed by Law) be issued by the said Council of the Village of Berley for the purpose of constructing the present proposed water supply system within said Village of Berley, Ohio, authorized by Section 3939 of the General Code of the State of Ohio.
