#### DETERMINATION OF MAXIMUM CAPACITY

The Maximum Capacity shall be the sum of the Individual Demands of each metered service, supplied under the provisions of this Schedule, except as modified hereinafter.

The Individual Demand of each metered service shall be determined separately. The Individual Demand shall be the Measured Demand where the connected load on a metered service is in excess of twenty (20) kilowatts; where the connected load is twenty (20) kilowatts or less, the Individual Demand may be determined, at the Company's option, as the Measured Demand established by continuous measurement or by periodic test, or as the Estimated Demand derived from the connected load.

Measured Demands, either by permanent installation of a demand meter or by periodic test, shall be determined in accordance with the Company's standard practices and, except in unusual cases, shall be the maximum 30 minute integrated kilowatt demand recording of an integrating demand meter, or the highest registration of a thermal type demand meter, during the billing period. In instances of highly fluctuating loads, or demands of short duration, the Measured Demand may be determined by appropriate metering equipment designed to measure fully the impact of such demands. Where Measured Demands are determined by periodic test, a Measured Demand so determined shall continue in effect until superseded by a subsequent test.

Estimated Demands shall be determined from the connected load on each individual metered service, as follows:

First 5,000 watts @ 90%  
Next 5,000 watts @ 80%  
Over 10,000 watts @ 70%

The Maximum Capacity in any month shall not be less than the minimum billing demand, if any, specified in the service contract.

#### MINIMUM CHARGE

The Minimum Monthly Charge shall be \$1.85 per kilowatt per month applied to a Maximum Capacity equivalent to 50% of the greater of (a) the highest Maximum Capacity previously established during the term of the service contract or (b) the capacity requirements of the consumer as specified in the service contract.

#### SERVICE AND CONTRACT PROVISIONS

Each separate point of delivery of service by one or more Metered Services shall be considered a Contract Location and shall be metered and billed under a separate service contract.

Only one Metered Service of each type, as to voltage and phase, will be supplied to a consumer under this Schedule at one Contract Location. Where two or more services are supplied to a consumer at one Contract Location said services, within the limitations above stated, may be combined in one service contract under this Schedule, or may be served under separate contracts under this or other applicable Schedules, at the consumer's option.

This Schedule is generally applicable to consumers with Maximum Capacity requirements of less than 20 kilowatts, although larger consumers may, from time to time, be served under its provisions. However, when a consumer's
