<b>Comments</b> <i>(Italicized comments are from previous review)</i>	
<b>3c</b>	Please provide a bar scale along with the indicated scale on the drawing. People may print this out at various paper sizes and the bar scale helps for reference.
<b>3f</b>	<p>Please indicated which trees are to be removed and which trees are existing. Is the blue spruce by the gate house being removed? The Acer platanoides ‘Globosum’ and Platanus x acerfolia ‘Bloodgood’ are both existing according to the images.</p> <p>The plan legend shows all Hosta ‘Patriots’ while the renderings show a mix of various hosta. Which is correct? If it is the mix, please indicate Hosta Mix on plant legend.</p> <p>It is understandable from a design perspective why there is a break in the bed in front of the gate in the stone wall to highlight the existing arborvitae. Why is there a second break nearer to the gate house? Perhaps consider another group of arborvitae to break up the bed line and give some height to the plantings?</p>
